Jerusalem Stone Company Launches Affordable Alternative to Marble and Granite

Posted on Oct 11, 2006 at 04:07 PM

Denver, CO- The Jerusalem Stone Company™ announces availability of a variety of unique stone direct from quarries in Israel. This is the same dolomite limestone that graces all buildings (including temples and churches) in Jerusalem. This launch represents the first time that stone from Israel is available in North America (on a wide scale) to both consumers direct and to dealers.

The beautiful stone is more economical than marble, yet is as durable because both are calcareous stone. The Jerusalem Stone arrives in tumbled, polished, brushed and honed finishes. The varieties have unique hues including: Jerusalem Bone, Jerusalem Gold, Jerusalem Pink and Jerusalem Grey. The stone is available in slabs and many different tile styles and textures. Mosaic, handmade, one-of-a-kind stone sinks/bowls are also available.
